

12 Volts Electric Pot Hauler

The electric pot hauler is an efficient and economical machine used to pull fishing wire and rope.

- The electric pot hauler is powered by a 12 volts DC motor via a reduction gearbox
- No hydraulic pipes and pumps are needed
- Can be operated in forward or reverse
- With a fully charged 100 Ah battery, the hauler works for 3 hours at 50% of its rated load
- Davit arm has a special place to be mounted when not in use
- Mounted easily inside a Scotty Downrigger Mount or inside a vertical 40mm pipe
- Can be made on starboard or port side
- Speed control available on request
